SUMMARY

Full-stack developer with nearly 5 years building web applications from the ground up, from frontend through to production deployment. I wrote frontend in JavaScript (ES6+) without page builders and created the Sass/SCSS theme foundation the team adopted across later projects. On the backend I worked with REST APIs and relational databases (MySQL and PostgreSQL) modelled from scratch, including authentication, session management and payment gateway integration. Currently focused on React, Next.js, TypeScript and Node.js.

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer

08/2021 – 05/2026 | Oliveira do Hospital, Portugal

Teia Digital - Consultoria em Rede

- Delivered 12 web applications in a team of 3 developers, taking each project end to end: frontend, backend and production deployment (Vercel, Docker).
- Wrote the entire frontend by hand, without page builders: JavaScript (ES6+), semantic HTML5 and Sass/SCSS, with mobile-first responsive layouts, accessibility and cross-browser support.
- Built a reusable component library in JavaScript and Sass/SCSS that the team went on to use across all subsequent projects.
- Developed REST APIs over MySQL databases I modelled from scratch, powering online transactions, synchronised catalogues and member areas with authentication and session management. Also integrated payment gateways and automated product feeds.
- Worked on the backend in PHP 8, on custom-built Drupal 9/10 themes with Twig components.
- Managed frontend build and dependencies with Node.js and npm, and organised the team's workflow in Git, with branching and code review.

EDUCATION

BSc in Computer Engineering

09/2017 – 07/2021 | Oliveira do Hospital, Portugal

ESTGOH – Polytechnic University of Coimbra

TECHNICAL SKILLS

JavaScript (ES6+) • TypeScript • React • Next.js • HTML5 • CSS3 • Sass/SCSS •
Tailwind CSS • Node.js • PHP 8 • MySQL • PostgreSQL • Drupal 9/10 • WordPress •
Git • Docker • Vercel • npm • Composer • Figma

LANGUAGES

Portuguese — Native

English — B2 (Intermediate)
